

The actual exam has the following sections, and the guide is broken down into the same categories:

Question Section	Description	Timed
Survey	Four questions about the candidate and their experience. Candidate answers do not affect the questions presented or the candidate's score.	No
	<p>Multiple-choice, True/False, and Drag-and-Drop question types. The first data file is loaded when the candidate clicks Next . After the candidate clicks Next , the driver loads the next data file and the next set of questions.</p>	Exam time
Post Exam	Description	Timed
Question Feedback	Allows the candidate to give feedback on individual questions. The candidate will see questions, but this section does not affect their exam results.	Comment time
Exam Feedback		

**Error/Condition:**

AutoCAD , Revit, or Inventor :

A black screen with the Autodesk Certified User logo appears for a long time when the exam starts.

**Solution:**

The driver is launching the Autodesk application. Be patient. If the application does not appear after 3 or 4 minutes, you might need to force quit the exam or
